PROFILE

Frontend-leaning software engineer and Computer Science undergraduate focused on React, Next.js, TypeScript, AI-assisted web products, and API-backed interfaces. Built production Clinify features including a speech-enabled OSCE simulation bot and gamified SBA/SAQ practice and exam flows; shipped frontend systems for an 80k-user gaming community and rebuilt admin tooling for ~500 admins.

SKILLS

Languages: TypeScript, JavaScript, Rust, Java, Python, SQL

Frontend: React, Next.js, Astro, Vite, Chakra UI, Tailwind CSS, HTML, CSS, Accessibility, Responsive UI

Backend/APIs: Node.js, NestJS, Express, Flask, Spring Boot, RESTful APIs, Authentication, Authorization, Security

Testing: Unit testing, Integration testing, Jest, Vitest, Playwright, Code review, CI/CD

Data/Systems: Postgres, Supabase, Prisma, Redis, Schema design, Query optimisation, Data structures, Algorithms, OOP, System design

Cloud/Delivery: Git, GitHub, Linux, Docker, Deployment, Observability, Logging, AWS, Azure, GCP, DigitalOcean

Spoken Languages: English and Chinese (fluent professional communication), German (A1 level, learning)

EXPERIENCE

Full-stack Engineer – Clinify

Mar 2024 – Mar 2025

- Implemented a production OSCE AI simulation bot with text-to-speech and speech-to-text workflows for patient-scenario practice.
- Built gamified SBA and SAQ interfaces for practice and exam modes using Next.js, React, TypeScript, Chakra UI, Supabase, and AI integrations.
- Ran a 100-user closed beta, synthesized user feedback into prioritized product requirements, and supplied roadmap recommendations to the CEO.
- Maintained centralized product and technical documentation for a 5-person team, keeping implementation context, handoff assets, and product decisions aligned.

IBM CIC Hackathon Finalist – UniSkill

Feb 2024

- Built the full frontend for a peer-to-peer skill-sharing and event-management proof of concept in a 48-hour IBM CIC Innovation Hackathon.
- Reached finalist status among 15 teams by shipping a demoable workflow for skill-sharing sessions, workshops, study groups, and event management.
- Presented the user problem, product workflow, API-backed implementation path, and technical artefacts through a structured final demo.

Frontend Engineer – Damage Inc

Jan 2023 – Nov 2023

- Architected and built a React/TypeScript RPG-style crafting and REP economy interface for an 80k-user gaming community platform.
- Designed and shipped a responsive React events page from Figma designs while maintaining cross-browser compatibility.
- Rebuilt a responsive Admin Control Panel from a legacy PHP system for ~500 admins managing recurring community workflows.
- Converted mobile-first Figma designs into reusable React/TypeScript UI structures with accessible interaction patterns across event, economy, and admin workflows.

EDUCATION

BSc Computer Science – University of Leicester

Sep 2023 – Jun 2026

- German grade equivalent: 2.0.
- Coursework and projects cover typed programming, object-oriented programming, algorithms, databases, database schema design, domain modelling, Rust systems programming, accessible web interfaces, and practical software engineering.

SELECTED PROJECTS

Rust Traffic Simulator | Rust, Simulation, Systems: Built a motorway traffic simulator with tests, benchmarks, visual output, deterministic modelling, and repeatable analytics.

Portfolio Website | Astro, React, Accessibility: Built a deployed Astro/React portfolio with 100 Lighthouse scores, TypeScript content models, and static checks.

EPQ | Python, Machine Learning, Research: Created an A* TensorFlow/Keras image-classification artefact using transfer learning with InceptionResNetV2.

RECORD OF MODULE MARKS FOR JUSTIN FUNG

Student number

Course name

Computer Science BSc

Start date

25 September 2023

Expected end date

05 June 2026

Justin Fung is a full-time undergraduate student at the University of Leicester and below is a record of their results to date:

Academic Year	Module	Module Name	Module Credits	Mark DE Equiv.	Grade	Credits Achieved
2023/4	CO1101	Computing Fundamentals	15	76.60 2,1	Pass	15
2023/4	CO1102	Programming Fundamentals	15	67.50 2,6	Pass	15
2023/4	CO1103	Mathematics Fundamentals	15	89.80 1,5	Pass	15
2023/4	CO1104	Computer Architecture	15	85.74 1,7	Pass	15
2023/4	CO1105	Introduction to Object Oriented Programming	15	70.19 2,4	Pass	15
2023/4	CO1106	Requirements Engineering and Professional Practice	15	62.50 2,8	Pass	15
2023/4	CO1107	Algorithms, Data Structures and Advanced Programming	15	77.00 2,1	Pass	15
2023/4	CO1108	Foundations of Computation	15	59.00 3,0	Pass	15
2024/5	CO2101	Operating Systems and Networking	15	77.27 2,1	Pass	15
2024/5	CO2102	Databases and Domain Modelling	15	73.84 2,3	Pass	15
2024/5	CO2123	Software Architecture and System Development - I	15	88.63 1,5	Pass	15
2024/5	CO2301	Project Management	15	75.37 2,2	Pass	15
2024/5	CO2104	User Interface Design and Evaluation	15	77.05 2,1	Pass	15
2024/5	CO2106	Data Analytics	15	79.00 2,0	Pass	15
2024/5	CO2124	Software Architecture and System Development - II	15	75.82 2,2	Pass	15
2024/5	CO2302	Software Engineering Group Project	15	77.60 2,1	Pass	15
2025/6	CO3101	Computers, Society & Professionalism	15	72.00 2,4	Pending	0
2025/6	CO3102	Mobile and Web Applications	15	80.45 1,9	Pending	0
2025/6	CO3219	Internet and Cloud Computing	15	74.70 2,2	Pending	0
2025/6	CO3002	Analysis and Design of Algorithms	15	*	*	0
2025/6	CO3093	Big Data and Predictive Analytics	15	*	*	0
2025/6	CO3201	Computer Science Project	45	*	*	0
